Changemaker Camps

****Short-term, intensive bursts of focused learning and reflection on a target challenge area.****

****Combine collective passion and wisdom to redesign your own mindsets, relationships, curriculum, and/or systems.****

Dear Educators and Community Leaders:

Changemaking is an approach to teaching, learning, and making a difference that involves not necessarily doing more, but doing differently.

It means owning your role in bringing positive change to your community. It means caring for your well-being so you can care for others. And it means working together to solve our most daunting challenges.

Most importantly, it takes a Changemaker to raise a Changemaker and we are all important models for young people.

Will you join us this Spring for a valuable, practical, and supportive VIRTUAL learning experience leveraging the four skills of Changemaking to change your world?

Brought to you by MWCC & United Way Youth Venture

These programs available to participating school partners only.

The Four Skills of Changemaking

- Teamwork
- Leadership
- Empathy
- Problem-solving
